**12. Description of procedures to be followed in the event that unexpected asbestos is found or previously nonfriable asbestos material becomes crumbled, pulverized, or reduced to powder.** Approved asbestos abatement procedures will be followed, including bulk sampling, laboratory analysis, abatement, clean up, and air monitoring.

**13. Procedure, including analytical method, if appropriate, used to detect the presence of asbestos material:** \_\_\_\_\_  
A recent building asbestos survey identified this material as asbestos containing.  
Any questionable material will be re-sampled and analyzed.

**14. I certify that an individual trained in the provisions of this regulation (40CFR Part 61, Subpart M) will be on-site during the demolition or renovation and evidence that the required training has been accomplished by this person will be available for inspection during normal business hours. (Required beginning November 20, 1991).**
